Bldg 1530, 2nd Floor B1
Kelly USA, TX 78236

U.S. AIR FORCE

PPM Time Line

- **ICDB program office was approached in 2004 to create a tool to allow HCI's the ability to down-load information from MHSPHP for patient population identification**
- **in 2004 ICDB created a tool to allow the HCI's to down-load information obtained by the MHSPHP, into ICDB; this was knows as the HCI tool, this tool worked, however, was limited**
- **SCR 438 was created and approved in April 2004 for functionality enhancement the of the HCI tool, given a non-critical priority**
- **June 2006 at the monthly Functional User Group Maj Perron, Clinical Oversight, requested ICDB review the HCI tool created by Lt Col Judy Rosen**

U.S. AIR FORCE

PPM Time Line

- June 2006 after positive reviews of Lt Col Rosen's HCI database Maj Perron recommends ICDB replicate database using a web-based platform and place it on the ICDB portal
- July 2006 ICDB team receives approval from SGR to proceed with Maj Perron's recommendations
- July 2006 Development process of PPM begins
- Dec 2006 PPM development for Phase I was complete
- Jan 2006 PPM went to QA testin

U.S. AIR FORCE

PPM Advantages

- Transforming the Rosen Tool into a Web based application accomplishes the following:
- Easier accessibility
- Decreases time spent to import data from the MHSPHP by at least 50%
- Increased automation of the monthly data import process from MHSPHP enables Users to perform other functions while import is in progress
- Eliminates the risk of data integrity compromise when importing data from the MHSPHP
- Increased application support and sustainment

Diabetic
Standard Letters
Closing
Sincerely,
Paragraph 1
Diabetes is a seriou t complications. As your Primary Care Manager, I want to ensure you are up-to-date with your diabetes care to help you prevent long-term problems such as heart disease, stroke, and eye, foot, and kidney problems.
Paragraph 2
I recommend that you schedule an appointment with me at least every 3-6 months to discuss your diabetes. These appointments will ensure you are current with your labs, foot and eye exams, vaccines, and blood pressure. Although managing diabetes may seem complicated, these appointments will make it easier for you to live a longer, healthier life.
Paragraph 3
Attached is your diabetic report card that shows your most recent results. If you are due for labs, take the laboratory request

HEDIS* measures look for continuously enrolled pts who meet criteria:

Diabetes: (age 18-75)

-Retinal exams performed in last 12 to 24 months if patient was not prescribed insulin in the past 12 months and the patient's most recent (in the past 12 months) HgBA1c is less than 8.0%. HEDIS also looks for a last exam as normal--can't be done with this database. Database defaults to assume last exam normal for eye exam list. Abnormal exams must be followed up at least annually by providers. For all
